Regulates Ovulation with....

ENSURE THE CONCEPTION

AI4VET

3rd Generation Formula with Omega-3 & Omega-6 Fatty Acids

Composition :

Each 5 ml contains :

Omega 3 fatty acid	125mg
Omega 6 fatty acid	125mg
Vitamin A	12000 IU
Vitamin E	5000 IU
Copper	50mg
Zinc	25mg
Manganese	25 mg
Potassium	5mg

Recommendation :

225 ml. to be administered orally with in 30 minuts after A.I. on the day of insemination

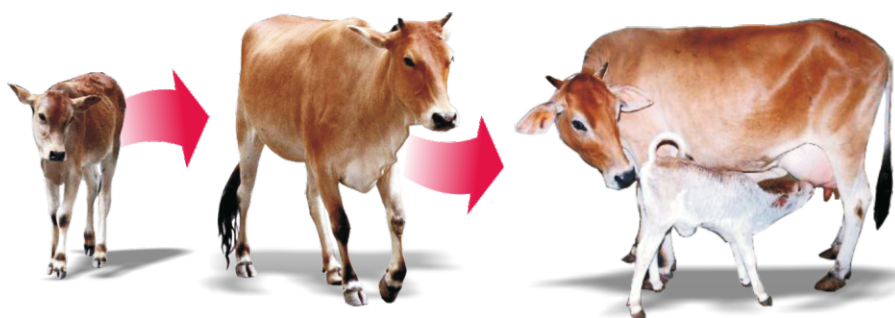

Or as directed by the veterinarian

Presentation : 225 ml

AI 4 VET is a conception improver liquid feed supplement containing omega-3 and omega-6 fatty acids. As various studies have shown that fatty acids play an important role in increasing conception rates in cattle.

The major problem of livestock is repeated breeding. Repeaters may lead to high economic loss to farmers as for when the animal repeat or do not conceive and again come in the heat after 21 days. This is one of the biggest losses to the farmer. So major demand in today's market is for products improving conception rates. So on the basis of market need we have found the solution to this repeat breeding problem via liquid feed supplement containing vitamins along with omega fatty acids.

Calf a Year Programme...

Benefits :

- Improves uterine turgidity and helps in establishing pregnancy
- Improves uterine tone
- Improves Uterine contraction
- Improves motility of sperms and ovum
- Tones up the uterine lining for implantion
- Improves uterine health
- Reduces chances of uterine infections

Antidote for Poisoning and
to Control Gastric Problems...

GASOKEMTM
Liquid

Nutritional supplement for
Acidity & Gas Problems

Enriched with aloe vera

COMPOSITION Each ml Contains :

Activated Charcoal	300 mg
Aloe vera Extracts	0.25 ml
Sodium Thiosulphate	10 mg
Milk of Magnesia	0.125 ml
Sodium Sulphate	5 mg
Ginger Extract	0.25 ml
Fenugreek Extract	0.125 ml
Magnesium Carbonate	4.5 mg
Flax Seed Oil	0.25 ml
Simethicone	200 mg
Osmotic Laxative	qs

Directions for use :

Cattle, Buffalo, Horse & Camel :

1-2 ml / kg body wt.

Calf, Sheep & Goat :

1-2 ml / kg body wt.

Repeat dose after 12 hours

Or as directed by the veterinarian

Presentation : 500 ml & 1litre

Highly effective in nature

Not for human / medicinal use

Animal Feed Supplement

Benefits :

- Helps to treat ulcer disease
- Normalising acid levels in the stomach.
- Strengthens the immune system
- Facilitates the absorption of water
- Helps to break down impacted food.

Benefits of Aloe Vera:

- Helps treat ulcer disease - normalizing acid levels in the stomach.
- Forms a lining throughout the colon to keep toxic waste from entering the body.
- Strengthens the immune system - Forms a barrier against microbial invasion [viruses].
- Facilitates the absorption of water, electrolytes and nutrition in the digestive system.
- Provides the raw material critical for lubrication of the joints.
- Has natural healing and detoxifying powers and works gently with the digestive tract to help break down impacted food.
- Helps sore and stressed muscles recover faster in working horses.

Tone up LIVER in better way...

Digetox-DSTM

Liquid

Enriched with Silymarin & Ginger

Composition :

Each 10 ml. contains:

Tricholine Citrate	100 mg.
Inositol	10 mg.
DL-Methionine	10 mg.
Vitamin B12	20 mcg.
Biotin (Vit H)	4 mcg.
Protein Hydrolysate	50 mg.
Yeast Extract	100 mg.
Liver Extract	100 mg.
L-Lysine	20 mg.
Ginger Powder	50 mg.
Silymarin	100 mg.
Syrup base	q.s.

Direction for Use :

Large Animal	40-50 ml. daily
Small Animal	15 - 20 ml. daily
For Poultry : Each 100 birds	
Chicks	5 ml daily
Growers & Broilers	10-15 ml daily
Layers	15-20 ml daily

Or as directed by the veterinarian.

Presentation : 200 ml, 500 ml & 1litre

Accurate formulation

Reaction free

Highly effective in nature

Not for human / medicinal use
Animal Feed Supplement

A healthy liver in a dairy cow serves many important functions:

Glucose production/synthesis, detoxification of ammonia and production of antibodies. The liver acts as a blood cleanser, detoxifier and plays a pivotal role for the proper functioning of animal organism. If a liver begins functioning abnormally, what is the best course of action to take?

Decreased appetite, reduced feed intake, metritis, emergence of mastitis... an immediate approach to these issues often consists of using antibiotics or enriching the cow's diet.

DIGETOX -DS is an excellent combination Tricholine citrate, Vitamin & Minerals so giving the best result without any side effect. These are accurately formulated using quality ingredients to ensure the effectiveness and enriched with power of Silymarin & Ginger.

INDICATIONS :

- Prevention of fatty liver
- Liver disorder of idiopathic origin
- Anorexia and debility
- Reduced feed intake
- Improve immunity, FCR & growth
- Stress of various etiology
- Along with dewormer & antibiotic therapy
- Protects the liver from the effect of toxins.
- It also increases milk production.

Animal Feed Supplement**

Giving birth is no simple task. This is true for nearly all species, including cattle. Bringing new life into this world is a miracle, but behind the awe and beauty is a mother who struggled for hours, giving her all.

While it is important to properly care for a newborn calf, it is also important to ensure the mother receives the care she needs as well. Giving birth takes a lot out of a cow – including calcium.

Proper calcium levels in a cow are crucial, especially post-calving. During the transition period, cows can need 4-10 times more calcium to finish developing a calf,

CHELATED DHUDHAM GOLD is a Chelated Calcium acts as a Growth Promoter. It helps to Increase Milk Production, Fat Percentage & SNF in Milk. It also Helps in Reducing Calcium, Phosphorus & Minerals Deficiency in Animals. Its an ideal feed supplement for Cow, Buffalo, Calf, Goat & Horse.

Mechanism of Action :

Calcium level regulation occurs via several signaling molecules, including parathyroid hormone (PTH), vitamin D, and calcitonin. Calcium is critical for many physiologic functions. Calcium is a major component of the bone matrix and teeth.

BENEFITS :

- Increase milk production and quality.
- Strong formation of bones
- Maintain peak production for longer time.
- Prevents milk fever and ketosis.
- Helps in weight gain of eggs
- Reduces egg shell breakage during early peak and advanced laying period.

Animal Feed Supplement

The uterus is one of the most important parts of the reproductive system of cattle. However there are several odd conditions accounted for the uterus as "METRITIS" which is inflammation of uterine tissue may be due to Bacterial Infection, Injury Etc. Metritis may be postpartum or prepartum.

In normal cases there will be Bacterial Infection, Injury to uterine tissues maybe by untrained A.I worker during A.I. Here there is swelling of uterine tissues seen along with mucus discharge which is known as "PYOMETRA" It may influence the Heat Cycle, Reproductive Efficiency, Hormonal Balance of the body leading to other reproductive problems. However, Pus Discharge may also be passed on to udder or teat leading to MASTITIS where there is sudden milk drop or swelling of the udder.

So to treat the infections we have come in market with Herbal Ecbolic and uterine tonic "Utrichem-DS" In the consists of herbs. So there are no side effects on the body of the Cattle.

Advantages:

- Reduces uterine pain & inflammation
- Ensure clear vaginal discharge
- Prevents puss formation

Maximum care of uterus

Prevents post partum metritis, pyometra etc.

Promotes involution of uterus

Ensure healthy conception rate

ROP uterine cleanser ecbolic

As supportive therapy in metritis, pyometra & milk enhancer

Animal Feed Supplement

Boostochem Advance can be very beneficial for animals. It improves blood glucose level and prevents parturition-related disorders and Ketosis. It acts as the most powerful energy booster, milk enhancer, as well as immunity booster or anti-stress liquid during any type of stress condition, maybe lactation stress, heat stress, disease stress which is leading to negative energy balance in the animals during Pre-partum, Post-partum & Peak lactation.

It is highly useful as an energy booster for recovering or preventing the weakness that occurred in animals during the pregnancy period.

Benefits :

- Reduces NEB in high yielding animals
- Reduces risk of subclinical / clinical Ketosis
- Improves reproductive performance
- Improves Milk Production & maintain milk yield
- Prevents fatty Liver and Improve feed intake
- Reduces dullness
- Reduces Heat Stress

Multi Task Single Solution...

MULTI 4TM VET-H

A unique combination of Protein, Iron with Multivitamins & Trace Minerals

Each 10 ml. contains :

Vitamin H	1500 mcg
Protein hydrosylate	100 mg
Ferrous Chloride(Iron)	100mg
Vitamin A	120000 I.U
Vitamin D3	60000 I.U
Vitamin E	50 mg
Vitamin C	10 mg
Vitamin B12	100 mcg
Mangnese	5 mg
Zinc	125 mg
Cobalt	1 mg
Selenium	1 mg

Usage :

Cow & Buffalo	: 20 ml daily
Calves	: 5 ml daily
Sheep & Goats	: 5 ml daily
Dog & Cats	: 2-3 ml daily

Poultry (Each 100 birds)

Chicks	: 5 ml.
Growers	: 7 ml.
Broilers & Layers	: 10 ml.

Or as directed by the veterinarian

Presentation :

100 ml, 250ml & 500 ml

Accurate formulation

Reaction free

Highly effective in nature

Multi 4 Vet- H is the best vitamin H for cow supplement that is also suitable for different types of cattle and poultry. The vitamins promote the overall well being of the animals. They also help in improving animal performance. Studies have shown that biotin addition to lactating dairy cows resulted in a significant increase in milk production. Even a slight increase in lactation will result in greater profitability for the Dairy farm. The vitamin cow supplement also helps prevent mastitis, which is a common complication in lactating cows. The ability of teats to hold milk determines the occurrence of mastitis.

Multi 4 Vet- H helps in improving teats and their ability to hold milk. This reduces the possibility of mastitis. Minor cases can also be resolved easily with the regular use of the vitamin supplement. The product contains active ingredients that instantly boost animal health.

Advantages :

- Meets requirement of protein, iron, vitamins & minerals during pregnancy.
- Improves milk production & SNF content of the milk.
- Improves immunity & disease resistance .
- Makes udder healthy & larger.
- Prevents infertility & reproductive problems.
- Enhances growth & production.
- Calves growth
- During mastitis for udder health & tissue repair
- During LSD for immunity & tissue repair

ENERGICALTM Gel Advance

Maintain normal calcium levels in cows during the Critical Pre-Calving & Immediate Post-Calving period

Each 100 gm contains

L-Carnitine	500 mg
Bio-Protein	1000 mg
Ionic Calcium	6600mg
Sodium Acid Phosphate	5000 mg
Vitamin A	140000 IU
Vitamin D3	38000 IU
Vitamin B12	400 mcg
Vitamin C	500 mg
Vitamin H	500 mcg
Magnesium	30 gm
Zinc	250 mg
Propylene glycol	1250 mg
Carbohydrate	1000 mg

Usage & Administration:

Pre Calving : Give one bottle alternative 3 to 5 days last month of Pregnancy
Post Calving : Give one bottle daily 3 to 5 days
Milk Fever : Give one bottle daily 3 to 5 days
Or as directed by the veterinarian

Presentation : 300 gm & 900 gm

Accurate formulation

Reaction free

Highly effective in nature

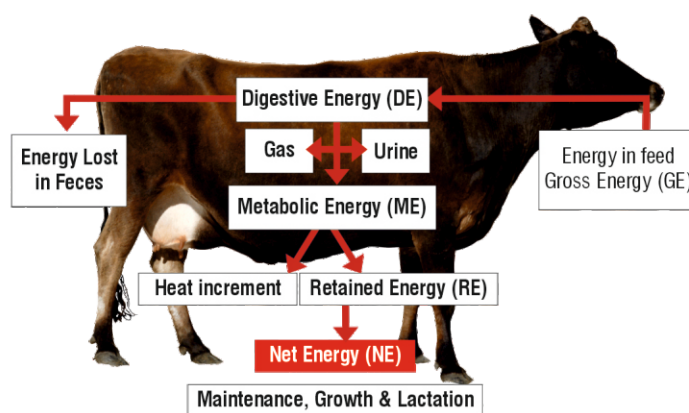

Not for human / medicinal use
Animal Feed Supplement

It is instant energy source with ionic calcium as calcium feed supplement for cattle or livestock animals used as oral therapy to treat milk fever or hypoglycemia. Also a good source of ionic calcium which is 5 times stronger than another oral calcium source so highly useful in milk fever or mastitis where there is a sudden drop in milk production occurs.

As a requirement for calcium after calving is twice or thrice the requirement before calving. So cow needs a high dose of as calcium. Otherwise, drop in calcium may lead to clinical and sub clinical hypoglycemia or milk fever.

Energical Gel Advance ensures rapid & efficient absorption of calcium and enhances serum calcium level within 15 min. of oral administration maintains serum calcium level longer than I/V calcium therapy.

Indications:

- To prevent milk fever & associated complications
- To increase milk yield & udder health
- For prevention of ketosis
- To normalise contraction of uterus, normal calving & timely expulsion of placenta
- Useful in off-feed conditions
- Useful in acidosis & heat stress

Animal Feed Supplement

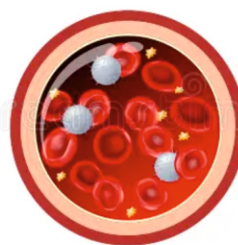

Iron Is an Essential Component of Ruminant Body. Young Animal on Milk Diet May Suffers from Iron Deficiency. Continuous Loss of Blood May Leads to Iron Deficiency. Sufficient Iron Is Essential for Calves as It Is Required for Various Physical Processes Especially in the production of "Hb" in Muscle where it binds to Oxygen and Transport it to Body. Iron has also the role in the production of antibiotics in the body.

So It Is Also Essential for Calf Resistance or Calf Immunity. It is Found That Calves Receiving Milk Replacers during life have more iron in the body than those fed on Mothers Milk.

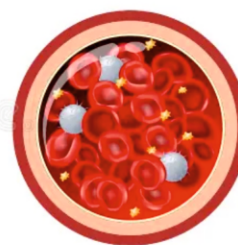

Iron 4 Vet especially Recommended in Surra and Red Water Disease in Cattle. Surra is Caused by Trypanosoma, Protozoa Transferred by the "Tabanu Flies" Decreases Rbc and Hb Leading to Loss of Appetite, Weight Loss, Anaemia, Oedema, Abortion, etc. So an Iron Deficiency Seen Due to Loss of Blood in Surra and Re-Ferrol is Found to be Highly Effective here to Recover Hb Levels.

Low

Animal Feed Supplement

Mastitis is an infectious disease condition resulting in an inflammatory reaction in the mammary gland of the cow. It is the most common disease in dairy cattle characterized by various degrees of severity - ranging from a mild disease with no gross changes in the secretion (milk) but an increase in inflammatory cells (somatic cells) in the milk, to a moderate disease with an increase in inflammatory cells and gross changes in the milk. It may be accompanied by signs of inflammation in the mammary gland including swelling, redness, and painfulness. Mastitis may progress to a severe disease with all of the above changes in the milk and systemic signs including fever, depression, and "off-feed" and occasionally even death in the most severe cases. Mastitis reduces milk production and milk quality.

Mastichem Powder was specially formulated for Cattle to give the safest and side-effect-free supplement,, keeping in mind the Efficacy and Quality of the product.

**Healthy non-infected udder structure
after treatment**

Indications:

- Reduce Inflammation & Pain
- Make Udder Healthy & Strengthen
- Minimize the bacterial load in udder
- Repair Udder Tissues
- Regulate Udder pH
- Improves Immune Function
- Reduced Leakage of Blood
- Better performance during FMD

Animal Feed Supplement

Rumen health is a key for production success. The rumen, or the fermentation vat, is used for feed digestion and provides energy to maintain the animal and production. However, there is more to cattle digestive tracts than just the rumen. The entire digestive tract from start to end needs to be in tip-top shape to prevent pathogens in feed from escaping from the digestive tract. The small and large intestine has drawn the attention of some researchers to further the understanding of how stress affects gut health in these regions of the digestive tract.

Digesacc-RB as a feed additive in ruminants. The use of feed additives containing live microorganisms and (or) their metabolites to alter rumen fermentation and improve animal performance has increased in response to demands for using more "natural" growth-promoting substances.

Advantages :

- Off Feed & Indigestion • Acidosis
- Usage during anti-biotic
- Improve digestion & feed intake
- Rejuvenate rumen microflora
- Support in bloat conditions
- Improves rumen pH
- Breakdown of Cellulose hemicellulose & Lignin bond

Animal Feed Supplement

Stress is the major problem in livestock which leads to Stress during summer leads to dehydration, diarrhea like conditions in livestock and also leads to decreased egg production in poultry. So these types of stresses future lead to other critical conditions like negative energy balance, ketosis, hypocalcemia, etc. in large animals.

This uniqueness of this formula is that it gives immediate response.

Coolkem is a unique solution as oral dehydration, an anti-stress and anti diarrhoeal formula for cattle, poultry, equine, sheep and goats

BENEFITS

- Provide resistance against summer's warmth.
- Maintains milk production
- Fight against oxidative stress & maintains immunity
- Maintains body temperature.
- Render the animals active, lively and healthy.
- Maintains body pH
- Dehydration.
- Keep stomach cool & Relieves summer stress.
- Optimum output in summer weather.
- Controls Heat Pressure.

Highly effective in nature

Not for human / medicinal use

Animal Feed Supplement

Various functions of the animals body, including growth, muscle formation, bone health, and various other processes, are affected by the mineral composition . Even though vitamins and minerals are considered micronutrients, they are crucial for the overall health and well-being of animals. Dairy Farmers need an all-in-one solution to maintain and improve the health of the farm animals. While the cattle and poultry feed are designed to provide all nutrients, supplementing the regular feed will greatly improve profitability.

The micronutrients are not absorbed properly by the body. That is why a chelated mineral mixture is more useful in cattle, poultry, and pigs. The vitamins and minerals are present together with a chelating agent. The chelating agent helps in the absorption of vitamins and minerals essential for overall growth. The immune system is strengthened with the regular supply of essential nutrition. This helps the animals to become disease resistant.

Benefits :

- Improves fertility rate / reduces dry period
- Reduces inter calving period
- Increases resistance power
- Treats infertility & repeat breeding
- Enhances growth & immune function
- Helps overall growth of young calves
- Cures weakness of legs
- Improve SNF & fat%

Pueraria tuberosa	10 gm.
Hemidesmus indica	5 gm.
Phyllanthus niruri	10 gm.
Terminalia chebula	5 gm.
Andrographis paniculata	15 gm.
Trachyspermum ammi	4 gm.
Pimpinella anisum	4 gm.
Zingiber officinale	2 gm.
Leptadenia reticulata	5 gm.
Boerhavia diffusa	4 gm.
Eclipta alba	5 gm.
Sindhav salt	14 gm.
Beed Lavan	5 gm.
Excipients	q.s.

Usage & Administration :

Cow, Horse & Buffalo:

20-25 gm. twice a day with feed.

Camel : 40 gm twice daily

Calf, Foal, Goat, Sheep & Dog :

10 gm. twice a day with feed.

Poultry & Fish : 1 kg / ton of feed.

Or as directed by the veterinarian

Presentation :

100 gm, 200 gm, 400 gm & 1 Kg

Accurate formulation

Reaction free

Highly effective in nature

Not for human / medicinal use

Animal Feed Supplement

Zyme 4 Vet powder contains Plant-Based Digestive Enzymes, which is an all-natural combination of essential herbs in a palatable powder. It is prevention of digestive disorders like Anorexia, Dyspepsia, Constipation etc.

Zyme 4 Vet powder stimulates appetite. Improve milk production in dairy animals and improve egg production in poultry. It is Boost up the formation of digestive enzymes and improve digestive and liver function, Increases resistance power in animals against bacterial & viral attacks and regulates the ruminant pH & restore the ruminant movement.

It is also faster recovery from illness and debility Indicated in disturbance of GI tract, diarrhoea acidosis, tympany & impaction.

Indications :

- Stimulate appetite.
- Boost up digestive & liver functions.
- Increase the formation of digestive enzymes.
- Increase resistance against bacterial & viral attacks.
- Improve milk production.
- Regulates the ruminal pH & restore the ruminal movement.
- Improve egg production in poultry

For a better start of Digestive Functions Normally...

DigesacC[®]

Bolus

"Optimized Digestion for
Peak Performance."

Each uncoated bolus contains :

Cobalt Sulphate	40 mg
Copper Sulphate	100 mg
Zinc Sulphate	200 mg
DL-Methionine	1 gm
Amylase	1500 Fccu
Cellulase	3500 Fccu
Xylanase	2000 Fccu
Papain	1500 Fccu
Live Lactobacillus Sporogenes	20x10 ⁶ Cfu
Saccharomyces Cerevisiae	25x10 ⁹ Cfu
Asper Gillus Oryzae	20x10 ⁶ Cfu
Fructo-Oligo Saccharide	250 Mg

Usage & Administration:

Cattle & Buffalo 2-4 boli daily for 4-5 days orally
Sheep & Goats Half boli daily for 4-5 days orally

or As directed by the veterinarian.

Presentation:

Box of 10 strips and each strip contains 4 boli

Accurate formulation

Reaction free

Highly effective in nature

Not for human / medicinal use
Animal Feed Supplement

Almost any dietary factor that can alter the intraruminal environment can cause simple indigestion. Simple indigestion is common in hand-fed dairy and beef cattle because of variability in the quality and quantity of their feed. Dairy cattle may gorge excessive quantities of highly palatable feeds such as corn or grass silage; beef cattle may eat excessive quantities of relatively indigestible, poor-quality roughage during winter. Indigestion can result from suddenly changing the feed, using spoiled or frozen feeds. Ruminal disorder is one of the major threats to the health and welfare of animals worldwide. The most common ruminal disorders/dysfunctions are usually defined as indigestion.

DigesacC Bolus right answer to multiple causes of Rumen dysfunctions.

- **Feeding Efficiency**
- **Feed Digestibility**

- **Better Intake**
- **Profitability**
- **Milk Yield & Production**

Advantages :

- Helps in Better Secretions of Saliva and Digestive Juices for Effective Digestion of Food.
- Optimizes Ruminal PH
- Maintains Perfect microflora in the Rumen for Better Digestion.
- Better Feed Utilization by Better Enzymatic Activity

Reproductive Target with all fertility Factors...

FertichemTM

Bolus

Boost Fertility.
Ensure Healthy Calves...

Each uncoated bolus contains :

Beta Carotene	500 mg
Chelated Zinc	350 mg
Chelated Copper	500 mg
Chelated Manganese	200 mg
Chelated Chromium	16 mg
Cobalt	60 mg
Iron	1500 mg
Iodine	140 mg
Selenium	6 mg
Vitamin E	20 mg
Saccharomyces Cerevisiae	10X10 ⁹ CFU

Dosage & Administration :

To improve heat :

1 bolus orally daily for 21 days during the cycle.

To improve conception rate :

1 bolus orally daily 7 days before and after AI.

Presentation : 7 Boli Pack

Accurate formulation

Animal Feed Supplement

Anoestrus in cattle is defined as the absence of proper estrus cycle or heat cycle which may be represented as either absence of sign of estrus or there may be the presence of the luteal cyst. There are various factors affecting the estrus cycle of cow or buffalo as Manage mental, Nutritional, Breeding, and Hormonal changes. Now as per various studies the majority of animals are showing anoestrus due to Manage mental or Nutritional deficiencies.

The animal may undergo anoestrus condition where animals do not show signs of estrus and it is one of the major loss to farmers economy as with this farmer may suffer the full seasonal loss of his animals earning which may be from milk obtained from the animal especially in case of heifer anoestrus running for long period leads to major economic loss.

The aim of our fertility bolus **Fertichem** is to support the preparation of the cow for oestrus and reproduction.

Indicated in :

- Anestrus Condition
- Low Intensity of Heat / Silent Heat
- Repeat Breeding
- Hormonal Deficiency
- Delayed Ovulation

Prepare Animals Before Calving with..

GauliteTM

POWDER

Complete Nutrition for Pregnant Animals

Enriched with specific Gluconeogenic precursor
Selected organic minerals & Rumen protected vitamins

Enhancing milk production in animals
affected with milk fever during previous lactation

Nutritional Supplement of Essential
Gluconeogenic precursor, fortified with
vitamins & minerals for pregnant animals.

Feeding Schedule :

Cattle & Buffalo :

1 sachet in Morning & 1 sachet Evening
for 20 days regularly.

Or as directed by the veterinarian

Feeding Advice:

Cattle & Buffalo:

Feed one 50 gm sachet of Minobolite
in the morning and one sachet in the
evening for 20 days during last month
of pregnancy

Presentation :

20 sachets of Minobolite
50 gm in a HDPE container

Accurate formulation

Not for human / medicinal use
Animal Feed Supplement

Mineral nutrition is the magic bullet for reproductive success in your beef operation? The number of mineral products for sale may give the impression that the answer is yes. However, in reality, mineral nutrition is just a part of a good nutrition and management plan. First, protein and energy requirements must be met. A good mineral program can't make up for a lack of protein and energy and low body condition scores in the herd. Once protein and energy requirements have been met, then a complete mineral supplementation program is next. The mineral supplement should be formulated to match regional forage and water resources.

Gaulite Powder an unique combination vitamin & minerals fortified with essential Gluconeogenic precursor significantly, a more positive energy balance for pregnant cows.

Advantage :

Regular feeding of **Gaulite**

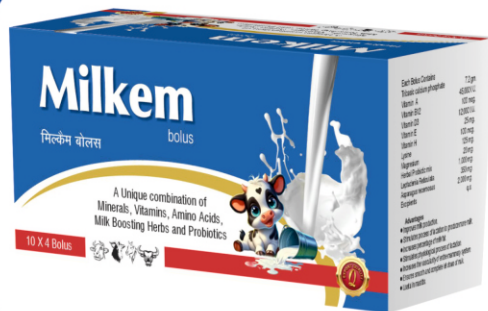

- Helps to mobilize Calcium & Phosphorus
- Avoid chances of hypocalcemia
- Helps in smooth calving
- Vitamin H help to development of udder
- Reduces chances of ROP

MilkemTM

BOLUS

Each Bolus Contains

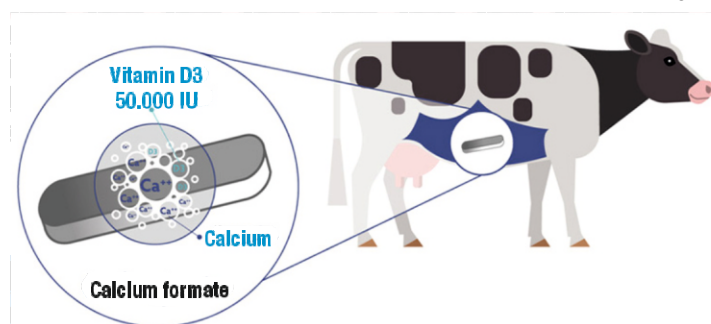

Tribasic calcium phosphate	7.2 gm.
Vitamin A	45,000 I.U.
Vitamin B12	100 mcg.
Vitamin D3	50,000 I.U.
Vitamin E	25 mg.
Vitamin H	100 mcg.
Lysine	125 mg.
Magnesium	20 mg.
Herbal Probiotic mix	1,000 mg.
Leptadenia Reticulata	350 mg.
Asparagus recemosus	2,000 mg.
Excipients	q.s.

Usage :

Large animals : 1 Bolus twice daily
Small animals : ½ Bolus twice daily
Double the dose in heavy calcium deficiency

Proper calcium levels in a cow are crucial, especially post-calving. During the transition period, cows can need 4-10 times more calcium to finish developing a calf, produce colostrum and begin milk production. This drastic increase in calcium demand within a short period of time can cause calcium deficiency and lead to hypocalcemia (milk fever). Hypocalcemia can lead to increased injury, decreased feed intake, increased risk of ketosis, increased risk of displaced abomasum and lower milk production. Therefore, preventative measures should be taken to reduce the possibility of hypocalcemia.

Milkem bolus a uniquely formulated bolus used to promote adequate calcium levels in transition cows. The formulation allows for two boluses (one dose) to be given immediately at freshening. Administering two boluses consecutively and not having to catch the cow 12 hours later means less stress on the cow and less stress for you.

High solubility, bioavailability and concentration

Sustained release in 10/12 hours of 12 g per pair of boluses

Improve uterine contraction

Against sub-clinic hypocalcemia

Fulfill calcium requirements after delivery.

Presentation : 10 strip X 4 bolus

Accurate formulation

Highly effective in nature

Not for human / medicinal use
Animal Feed Supplement

Advantages:

- Improves milk production.
- Stimulates process of lactation to produce more milk.
- Increases percentage of milk fat.
- Stimulates physiological process of lactation.
- Increases the vascularity of entire mammary system.
- Ensures smooth and complete let down of milk.
- Useful in mastitis.

MilkemTM

POWDER

COMPOSITION (per kg):

Skimmed Milk Powder	40%
Whey Powder	25%
Maltodextrin	10%
Vegetable & Animal Fat Blend	
(Preserved with BHA, BHT, and Mixed Tocopherols)	15%
Vitamins & Minerals Premix	5%
Digestive Enzymes & Probiotics	3%
Flavouring & Stabilizing Agents	q.s.

Based:

Casein, Dried Whey & Maltodextrin Base

NUTRITIONAL VALUE:

- Crude Protein: Min. 22%
- Crude Fat: Min. 18%
- Moisture: Max. 5%
- Crude Fibre: Max. 0.5%

FEEDING DIRECTIONS:

1. Mix 1 part (100g) of **Milkem** in 7 parts (700ml) of warm water (40–45°C).
2. Stir well until completely dissolved.
3. Feed the milk replacer twice daily or as advised by a veterinarian.
4. Always prepare fresh feed before each meal.

Presentation : 500 gm., 1 kg. & 25 kg

Accurate formulation

Reaction free

Animal Feed Supplement

Each dairy farmer wants proper growth of dairy animals so that they can give adequate milk to go for sale. When we talk about milk yield it directly means we have to give animal a diet rich in calcium because, due to milk yield a lot of calcium goes out of the animal's body. Calcium is also essential for optimum milk production and growth rate. Calcium is one of the main components of bone and so is an important but often overlooked factor in achieving proper growth rate is slower if calcium intake is inadequate.

Milkem provides a magical calcium feed supplement. It is high potency double strength calcium which helps to increase milk yield higher and prevents milk fever. It is an instant calcium source for cattle after parturition which enriched with milk enhancing herbs.

BENEFITS:

- Promotes fast growth and strong bones.
- Builds immunity and resistance against diseases.
- Ensures proper digestion and nutrient absorption.
- Economical and safe substitute for whole milk.

PhoskemTM

POWDER

Essential Phosphates for
Exceptional Results

Composition : Each 1 Kg. Contains :

Butafosfan	50,000 mg
Vitamin B12	20,000 mcg
Essential Phosphates	500,000 I.U.
L-Lysine HCl	3,000 mg.
DL-Methionine	6,000 mg.
Zinc Sulphate Monohydrate	50 gm.
Biotin	20,000 mcg
Amylase	25 gm.
Lypase	25 gm.
Protease	25 gm.
Carrier/Base	(Maltodextrin/Dextrose q.s.)

Usage:

Dairy Cattle:

Routine: 50–100 g per animal per day

Stress/Calving/Weakness :

up to 150 gm per animal per day

Buffalo :

Routine: 60–120 g per animal per day

Stress/High Milk Yield/Illness:

150–180 g per animal per day

Poultry :

(Broiler / Layer / Breeder):

100–200 g per 1000 birds per day

Mix in drinking water or feed for 5–7 days
during stress, vaccination, growth phase
or production drops.

Always dissolve in clean drinking water or
sprinkle evenly on feed.

Presentation : 100 gm., 500 gm. &
1 Kg. Water Soluble powder

Animal Feed Supplement

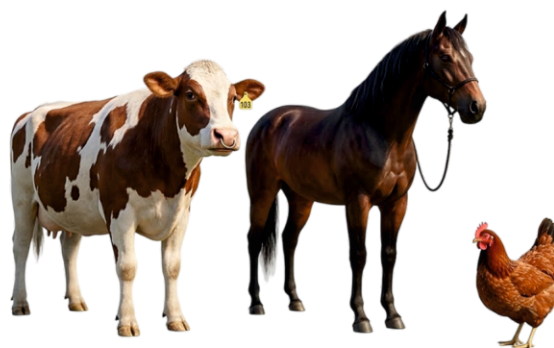

Phoskem is a concentrated veterinary metabolic and nutritional supplement, commonly formulated as a water-soluble powder or injectable for livestock and poultry. It functions as a metabolic stimulant and "tonic" designed to optimize energy levels, support organ function, and aid in recovery from stress or disease.

Primary Function: Acts as a metabolic stimulant and "tonic" to help animals recover from stress, over-exertion, or poor nutrition.

Target Animals: Typically used for cattle, horses, swine, and poultry.

Advantages :

- ✓ Improves energy metabolism & liver function
- ✓ Boosts milk yield in dairy cattle & buffalo
- ✓ Supports rapid growth & FCR improvement in poultry
- ✓ Enhances hoof/leg health (Biotin + Zinc)
- ✓ Reduces stress during calving, transport, vaccination & heat stress
- ✓ Stimulates appetite & improves digestion (enzymes blend)

FMD Beater

POWDER

The Right Choice... For Prevention & Treatment

Composition :

Each 100 gm. contains:

Vitamin A	300 mg
Vitamin C	6 gm
Zinc	2 gm
Copper	2 gm
Cobalt	80 mg
Magnesium Sulphate	2 gm
Vitamin E	4 gm
Vitamin B12	8 mg
Vitamin K	40 mg
Iron	100 mg
Selenium	40 mg
L-Lysine	16 gm
DL-Methionine	16 gm
Choline Chloride	16 gm
Neem	5 gm
Haldi	40 gm
Garlic Extract	1 gm
Alovera	5 gm
Chirayata	2.5 gm
Dextrose	4 gm
Arginine	1 gm

Usage & Administration :

Cow & Buffalo : 25 gms once or twice daily
Small Animals : 5-10 gm once or twice daily
or as directed by the veterinarian

Presentation : 100 gm. & 500 gm.

Accurate formulation

Reaction free

Not for human / medicinal use

Animal Feed Supplement

Foot and mouth disease (FMD) is a severe, highly contagious viral disease of livestock that has a significant economic impact. The disease affects cattle, swine, sheep, goats and other cloven-hoofed ruminants. It is a transboundary animal disease (TAD) that deeply affect the production of livestock and disrupting regional and international trade in animals and animal products. The disease is estimated to circulate in 77% of the global livestock population, in Africa, the Middle East and Asia.

Mode of Action :

FMD MUKT Cures mouth lesions in just 24 hrs. & animal starts grazing. The salivation is reduced to a very considerable quantity and recovery starts within 24 hrs.

The diarrhoea, fever and other FMD complaints

The foot lesions also starts to dry up.

Prevents exogenous growth in between foot pads.

All types of wounds like FMD lesions, Degnala disease. Surgical wounds, Inflammatory conditions like Mastitis & Metritis

Not for human / medicinal use

Animal Feed Supplement

Worm infestation is one of the major problems in animals. Mainly animals infested with worms from an early age. Infield conditions, worms are mostly found in animals showing symptoms as decreased growth even on proper feed, decreased milk production even in healthy conditions, anorexia, indigestion, etc.

Calves show emaciation or bloat-like symptoms. Anestrus and repeat breeding are major problems of animals that are even related to worms. Now the dairy farmer is even quite aware of dewormers as chemical dewormers containing albendazole, fenbendazole or oxfendazole, etc. salts but with continuous use of these animals are now adapted and are completely nonresponsive to these dewormers. So to find the proper solution of worms with minor or no adaptability in animals Vetchem has shown the 1st step in launching herbal dewormer bolus which is safe in nonpregnant, pregnant, and lactating animals.

BENEFITS:-

- Highly effective to expel worms as compared to chemical dewormers.
- Safe in pregnancy
- Does not destroy ruminal microflora
- Expel worms and improves fertility.

Vetaid

Powder/Liquid & Solution Kit

An Unique Formulation with
Vitamins, Minerals, Amino Acids, Enzyme &
Essential Herbs

Composition :

Each 100 gm contains:

Vitamins, Micro minerals, Amino Acid, DL-Methionine, Andrographis paniculata, Moringa Oleifera, Azadirachta indica, Ocimum Sanctum, Curcuma Longa, Ashwagandha, Zingiber officinale, Allivum Sativum, Laurus nobilis, Chirayita & Serratiopeptidase

Usage & Administration :

Powder :

Cow & Buffalo : 20 gm once or twice daily
Small Animals : 5-10 gm once or twice daily
to be mix in jaggary

Liquid :

Cow & Buffalo : 50 ml once or twice daily
Small Animals : 20-30 ml once or twice daily

or as directed by the veterinarian

Composition : Solution

Alkyldimethy Benzalkonium chloride,
Citric acid, Acetic acid, Inter ingredients
& Essential herbs

Direction for use :

8-10 ml / litre of water & spray on
empty shed or spray on the infected
animals Or as directed by the veterinarian.

Highly effective in nature

Not for human / medicinal use
Animal Feed Supplement

A Rumen Buffer Metabolic Booster with Live Yeast Culture is a specialized feed supplement designed to stabilize the digestive environment (rumen) of cattle, particularly during high-production periods or heat stress.

Bufferchem generally combine chemical alkalizers with biological probiotics to manage pH and enhance digestion.

The most common strain, which scavenges oxygen in the rumen to create a better environment for beneficial fiber-digesting bacteria.

Benefits :

pH Stabilization: Prevents Sub-Acute Ruminal Acidosis (SARA) by neutralizing excess acids produced from high-grain diets.

Enhanced Digestion: Increases the digestibility of Neutral Detergent Fiber (NDF) and Acid Detergent Fiber (ADF), allowing the animal to extract more energy from forage.

Improved Performance: Supports higher dry matter intake (DMI) and can increase milk yield and fat content in dairy cows.

Heat Stress Mitigation: Helps cattle maintain normal rumination and feeding behavior during hot weathers
